Data Centers

All of LMI's partnered data centers are SSAE16 compliant, meeting industry-recognized requirements for security and reliability.

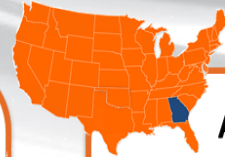

Phoenix

Our Phoenix data center is one of the US's largest data centers. It is also one of the only commercially-available data centers to have achieved Tier III Certification for Design Documents from the Uptime Institute. Located in one of the lowest zones for natural disasters, our Phoenix location ensures peace of mind for disaster recovery.

Dallas

Our Dallas data center maintains multiple power feeds, fiber links, dedicated generators, and battery backups. It is built from industry-leading hardware and equipment, ensuring the highest level of performance, reliability, and interoperability. With a low instance of natural disasters, outages are nearly unheard of in this area of the country, assuring access to your systems.

Atlanta

Our Tier 4 Atlanta Data Center contains 36 Generators supporting 16 independent UPS Systems. It is powered by 2 diverse substations and two electrical grids. It has 30+ carriers and IP Providers in house and recently achieved Phase II LEED Gold certification. At 940,000 sq/ft it is one of the world's largest and most advanced data centers.
